Summary

I like writing clean code that solves problems in an elegant and effective way. I aim to deliver the most value at the least cost, without giving up on quality. To me, doing things well means testing, modeling with care, discussing with colleagues and automating the checks on the decisions we make. I have been building web applications since 2007, most of them on Symfony and Doctrine with a domain-driven approach, and I have led and mentored small teams along the way. I am open to both freelance and employed positions, as long as the environment is informal and people and ideas matter more than labels.

Projects

- # **JobBoy** - jobs manager - open source PHP library (MIT, on Packagist), PHP 7, no longer maintained
github.com/danielsan80/jobboy-doc/blob/master/doc/jobboy.md
- # **FixtureHandler** - test utility - open source PHP library (MIT, on Packagist), PHP 7, no longer maintained
github.com/danielsan80/fixture-handler
- # **Mini Race Challenge** - Timing system for small RC cars (3D printed parts)
miniracechallenge.com :: www.thingiverse.com/thing:5364319 :: github.com/danielsan80/minirace-gate
- # **QRiddle** - ReactJS/TypeScript web app built with Claude Code: a vibe coding experiment, but tested and reviewed, followed end to end from the first commit through CI/CD to its launch

Experience

Consultant & Full Stack Developer	Resolvi Srl, Riccione - <i>remote</i>	Aug 2026 - present
◦ Restored the test suite, abandoned after a stack upgrade, with the help of Claude Code. ◦ Brought the tests back into the CI pipeline as a prerequisite for deployment. ◦ Occasional support on new feature development.		

Consultant & Full Stack Developer	QMateS Srl, Milan - <i>remote</i>	Apr 2026 - Jul 2026
◦ Organization Design consulting at a client company (Java/MongoDB/Kafka stack): weekly analyses and proposals to the CTO to streamline internal processes. ◦ New features and refactoring in pair programming with the client's developers, to spot problems in the field and validate the proposed solutions. ◦ In-house workshops on code hot spots and refactoring techniques, to gradually reduce technical debt.		

Full Stack Developer	Facile.it SpA, Milan - <i>remote</i>	Aug 2025 - Mar 2026
◦ Development of new features for the internal CRM. ◦ Integration of the CRM with in-house services. ◦ Supported the team in reorganizing the codebase along DDD lines.		

Full Stack Developer	Soisy SpA, Milan - <i>remote</i>	Feb 2020 - Jun 2025
- Development and optimization of the back office of a BNPL platform (born as a peer-to-peer lending marketplace), business process automation and integration with third-party services. - Work on the web app, in particular the onboarding funnel. - Technical activities for the run-off of the platform after the acquisition by Compass.		
Lead Full Stack Developer	Idrolab Srl, Rimini/Cesena - <i>remote</i>	Mar 2015 - Feb 2025
- Initial training of the in-house team (3 developers) on Symfony 2 and object-oriented programming. - Analysis, design, kick-off, development and engineering of Symfony applications. - Coordination and mentoring of a team of 3-5 developers, problem solving, support to recruiting. - Maintenance, refactoring and new features on the applications delivered.		
Solo Full Stack Developer	Ehoreca Srl, Milan - <i>remote</i>	Nov 2018 - Feb 2019
- In charge of restoring the Ehoreca platform for demo purposes, after 3 years of inactivity. - Upgrade of the development environment, dependencies and configuration.		
Full Stack Developer	Grindaland Ltd, San Gwann, Malta - <i>remote</i>	Feb 2014 - May 2014
- Consulting on an integration problem with partner sites via web scraping. - Analysis and implementation of the proposed technical solution.		
Full Stack Developer	Oboxo Srl, Varese - <i>remote</i>	Feb 2014 - Aug 2014
- Feature development on the company's social platform. - Startup wound up after a few months when the investors pulled out.		
Lead Full Stack Developer	App&Map Srl, Milan - <i>remote</i>	Nov 2013 - Jan 2015
API and back office development for a mobile app with geo-referenced content for local authorities and companies.		
Full Stack Developer	Iabadabadu Srl, Fano - <i>remote</i>	Mar 2013 - Dec 2013
- Refactoring of a client's legacy site and integration of Symfony 2.1, in order to develop new features. - Presented the project as a case study at SymfonyDay 2013, covering the technical challenges faced.		
Full Stack Developer	Ideato Srl, Cesena - <i>remote</i>	Aug 2012 - Sep 2012
Analysis and development of a web application to browse promotions from XML files, for IdroLAB.		
Lead Developer, Co-founder	Abmundi, Riccione	Jan 2012 - Dec 2012
- Built a social platform for personal goal management in 4 months, then followed up on it. - First full-scale experiment with agile methodologies. - First project on Symfony 2.0.		

Web Developer

Retina Snc, Cattolica

Jan 2009 - Dec 2011

- Development and maintenance of the in-house CMS: refactoring, new features and bug fixes.
- Kick-off and technical management of websites and web projects for the agency's clients.

Web Developer

Celera, Riccione

Jun 2007 - Dec 2008

- First professional experience: analysis, design, development and management of websites and web applications.
- Built from scratch a newsletter application that stayed in use for years.

Education

University of Bologna, Cesena campus

Master's degree in Computer Science (Scienze dell'Informazione, five-year program)

Cesena, Italy

Sep 1999 - Oct 2006

"P. Gobetti" Technical Institute for Business - experimental "Mercurio" program

High school diploma in Accounting and Programming

Morciano di Romagna

Sep 1994 - Jul 1999

Training

Building enterprise applications with Node.js

9-10 Feb 2017

- Course organized by Avanscoperta and taught by Matteo Collina.

Agile Contracts - Negotiation exercises in the context of contracts

21 Jun 2016

- Course organized by Avanscoperta and taught by Jacopo Romei.

PhpDay, JsDay, SymfonyDay and others - Italian conferences

Since 2009

- Attended mostly PhpDay, JsDay and SymfonyDay, sometimes as a volunteer and once as a speaker.
- Also AgileDay, BetterSoftware, DevOpsDay and, more recently, Working Software and SoCraTes Italy (September 2026).

Skills

Programming languages:  PHP  JavaScript  TypeScript  Python  Java

Frameworks:  Symfony  Doctrine ORM  API Platform  ReactJS  Spring Boot  AngularJS

Practices:  TDD  Clean Code  Refactoring techniques  Agile  Scrum  Kanban

Architecture:  DDD  Hexagonal Architecture  CQRS/ES  OOP

Infrastructure:  Linux  Nginx  MySQL/MariaDB  MongoDB  CouchDB  RabbitMQ  Elasticsearch  Kafka

Tools:  Git  Docker  GitLab  GitHub  BitBucket  Claude Code  Jira  Trello

Languages:  Italian (native)  English (intermediate: reading and writing; spoken in progress)
